

xCountertops

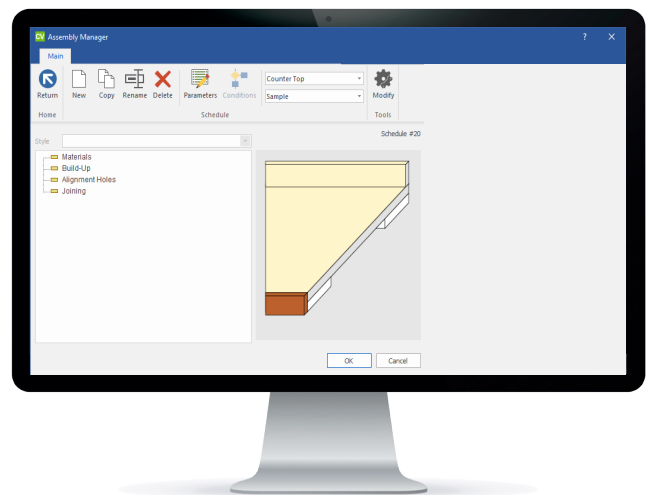

Making countertop construction part of a seamless manufacturing process

The xCountertop multiplier is fully integrated with CABINET VISION, making it possible for you to configure countertop construction with the same Assembly Manager interface used for cabinets, closets, and drawers. xCountertop calculates cut lists for countertops, automatically updates manufacturing operations with changes made in design and makes it easy to configure build-up, draw-bolts, dog bones, alignment boring and other machining on your countertops. All while giving you a clear overview of costs.

Key Features

- Define countertop construction methods
- Specify countertop joint machining (tite joints/alignment boring)
- Modify sink/cooktop cut-outs
- Countertop modifications

We are here for you!

Our customer service representatives and support technicians are on hand to help you become more successful. If you have any questions or requests, please contact us.
